

# GREEN INITIATIVE

Learn More!

The AIFS Abroad Green Initiative is a fundamental commitment to address the critical threat of climate change to our future. We understand that the only way to effectively combat this crisis and mitigate the effects of climate change is to drastically reduce our environmental impact. Therefore, **AIFS Abroad has committed to reaching carbon neutrality by the year 2025.**

1

## Carbon Offsetting

All AIFS Abroad Participants will have their international air travel offset by the purchasing of carbon credits in vetted global projects, primarily in developing countries. **In 2021 we offset 780 tons of carbon!**

2

## Education

All AIFS Abroad Programs will include an environmental education component exposing participants to best practices in host countries and providing incentives and tools to help reduce each participant's environmental footprint.

3

## Green Business

We are auditing all our organizational activities to reduce our environmental footprint, including dramatically reducing paper use, examining office practices and focusing on energy usage overall.
